About

Currently an active student of Assumption University of Thailand, Computer Science faculty, majoring in Informatics B.S. I have become interested in computers since middle school, what led me to getting a degree in CS. I'm passionate about computer and software architecture, writing server side of apps and websites in particular. Most of my career I've been working with private customers building proprietary web projects (forums, e-commerce) and other stuff like: finance management systems, automatic bitcoin exchange systems.
